Be aware you are entering a clinical trial study when you take a covid “vaccine.” They are experimental and cannot be fully approved until 2023. Many people have already died from them. Others worldwide have permanent neurological damage, blood clots, heart attacks, Bell’s palsy, paralysis... The list is endless. Astra Zeneca’s vaccine has been halted because of deaths and harm due to blood clots.

Are you aware that the Federal government put Canada into a trial study? <https://www.canada.ca/en/public-health/services/immunization/national-advisory-committee-on-immunization-naci/research-priorities-covid-19-vaccines.html>

Accordingly, you can decline this vaccine.

A vaccine for a virus that has a lethality lower than the flu? With an overall survival rate greater than 99%? Just think about it. Or listen to medical and scientific experts who warn you against taking the vaccine (see below.) It has been referred to as a depopulation tool.

The tests are 100% unreliable, reporting 90% false positives. This is what governments are relying on to maintain the belief that there is a deadly pathogen on the loose. Also, the tests’ stems damage the thin brain barrier upon insertion and have also cause deaths.

The masks are causing pulmonary infections—and now Health Canada have recalled the blue and grey masks from China as they are filled with toxic graphene. You have been forced to wear them for a year. Also live nanofibres which are activated with heat have now been discovered in them.

This is not a theory but a conspiracy on a grand scale to reduce world population—not because we are overpopulated but because AI and robots are replacing us. If you want to know who is behind this, look at the Davos attendees and the owners of the central banks.
